PERCENT OF STATE POPULATION ENROLLED

STATE SPENDING PER CHILD ENROLLED (2016 DOLLARS)

Florida's Voluntary Prekindergarten (VPK) Education Program was created as a result of the 2002 state constitutional amendment requiring prekindergarten access for all of Florida's 4-year-olds. The program began operating in 2005, serving approximately 100,000 children. Since that time, enrollment has increased steadily to more than 175,000 children in the 2011-2012 program year, decreasing in 2012-2013 and 2013-2014 in response to a declining preschool population but increasing slightly in 2015-2016. Starting in the 2016-2017 school year, parents are permitted to postpone enrollment for 4-year-olds in the VPK program and 5-year-olds will be eligible. VPK was jointly managed in 2013-2014 by Florida's Office of Early Learning (OEL) and the Department of Children and Families. Florida's Office of Early Learning (OEL) was established as an independent agency administratively linked to the DOE, separated from Florida's Agency for Workforce Innovation in 2011.

Age-eligible children are enrolled in either a 300-hour summer program, which every school district is mandated to offer, or a school-year program totaling 540 instructional hours. Teachers in the school-year program are required to have at minimum, a Child Development Associate (CDA) degree or equivalent credential. Teachers in the summer program are required to have a bachelor's degree. In 2011, the Florida Early Learning and Developmental Standards for Four-Year-Olds was approved by the State Board of Education, which all programs were required to meet in the 2012-2013 school year. The state is currently revising these standards and will begin implementation during the 2018-2019 school year. A variety of settings provide VPK, such as public schools, accredited nonpublic schools, licensed child care centers, accredited faith-based centers, and licensed family child care homes. The majority of children are provided services in nonpublic school settings. Regional early learning coalitions are formed to monitor programs for compliance and to administer VPK. The coalitions also distribute funds to VPK programs based on a fixed hourly rate.

The VPK program is reviewed annually as part of the legislative appropriation process and funding is determined by the legislative body. VPK is assessed annually based on the Florida Kindergarten Readiness Screener (FLKRS), composed of FAIR and ECHOS, administered within the first 30 days of kindergarten, comparing children and programs that participated in VPK to those that did not. Legislation adopted in 2011 requires the State Board of Education to periodically adopt a minimum kindergarten readiness rate to assess satisfactory delivery of the VPK Education Program by providers and schools. Beginning with the 2011-2012 program year, the state changed the requirements for children to be ready for kindergarten to require that children be rated as proficient on both the ECHOS and FAIR components of FLKRS. Beginning with the 2012-2013 school year, all providers were required to administer the Florida VPK assessment at the beginning and end of the school year. Results from the first and third assessment periods will be collected and used as a pre- and post-assessment to demonstrate learning gains. Starting with the 2014-2015 school year, Work Sampling was added to the FLKRS. In 2015-2016, Teaching Strategies GOLD was used by all VPK providers to assess children's development in domains not covered by the VPK assessment. However, the state legislature decided against using this assessment in subsequent years.

Florida's School Readiness Program, a separate initiative started in 1999, expanded in 2001 by incorporating two other state programs—the Prekindergarten Early Intervention Program, which focused on young children's health, and the State Migrant Prekindergarten Program, which served 3- and 4-year-olds whose parents are migratory agricultural or fishing industry laborers. The program offers financial assistance for child care to qualified parents. This report focuses solely on the VPK program.

Please note that funding and enrollment data are current; all other information was provided and confirmed for the 2014 Yearbook. Information regarding new quality standards benchmarks was obtained through a thorough review of the Education Code, Annual Report, and other publicly available documents.
